

STRATEGIC PLANNING

WE HELP PEOPLE WORK TOGETHER BETTER.

we pull from our extensive roster of analytical tools and planning methodologies to create the best custom process for your organization. Strategic planning offers the opportunity to ask and answer the big questions that shape your organization's direction. In addition to producing a plan generating commitment to that plan, our process will build camaraderie, expand expertise, empower internal planners, and create energy for your organization and its constituents.

- Vision or mission clarification
- Breakthrough ideas to transform direction
- Iterative goals to move basic organizational functions forward
- Meta-Metrics™ that measure success for the entire organization
- Communication plans
- Implementation assistance

We offer a range of services to support our mission of helping people work together better.

“The process was terrific. It was the first time we engaged everybody on staff, including corporate and field offices, the first time we really sat down and discussed where we were going and what was important. What were our values? What did it mean to be successful? Sure, we had grown, but we didn't really turn into a company until Laura came along.”

LISA O., HEALTH ASSOCIATES

“Thank you for all your assistance through the strategic planning process. We're very pleased with the outcome, very excited about the future for CMA, and we absolutely couldn't have done it without OPG!”
